Full Stack Developer with 2+ years of hands-on experience building scalable, performant web applications using the MERN stack. Proficient in both front-end and back-end development, including building RESTful APIs, integrating databases, managing state, and deploying apps on cloud platforms. Passionate about creating intuitive UI/UX and writing clean, maintainable code. Currently working on live e-commerce applications with secure authentication and payment flows.

💼 **Professional Experience**

Xtroniq Technologies — *Full Stack Developer*

Remote | Jul 2023 – Present

- Developed and maintained responsive MERN stack applications with authentication, product listing, cart, and order modules.
- Designed and integrated RESTful APIs using Express.js, ensuring secure communication with JWT.
- Implemented MongoDB database schema with indexing for performance optimization.
- Worked on payment gateway integration, dynamic routing, and admin panels.
- Collaborated with designers and QA for seamless deployment using Git, Netlify, and AWS.

AccioJob — *Mentor / Mock Interviewer (Part-Time)*

Remote | May 2023 – Mar 2025

- Mentored 1000+ students on MERN stack, DSA, and full-stack project development.
- Conducted 2500+ mock interviews and live sessions for job preparation.
- Assisted in resume building and interview strategies.
- Personalized 1:1 live sessions to address student doubts and enhance their understanding.

Coding Ninjas — *Teaching Assistant - Coding*

Remote | Aug 2021 – Aug 2022

- Conducted live coding sessions and doubt-solving for students in DSA and JavaScript.
- Reviewed and debugged student codebases, improving learning outcomes.
- Mentored and guided junior developers, providing technical expertise, code reviews, and constructive feedback to enhance programming skills.
- Assisted team members in completing assignments and projects by offering guidance, troubleshooting assistance, and innovative solutions.

Firdekho — *QA Tester / Manual Tester*
Kolkata | Mar 2019 – Jan 2021

- Created and executed test cases, performed regression and cross-browser testing.
- Reported and tracked bugs, ensuring adherence to quality standards.
- Conducted manual testing of web and mobile applications to identify defects and ensure proper functionality.
- Worked closely with developers and product managers to understand software requirements and ensure quality standards.

📊 Projects

✨ **Movie App:** sparkly-choux-7969f1.netlify.app

- React app fetching live movie data with search, filtering, and responsive design.

☕ **Food App:** GitHub - FoodApp

- MERN-based food ordering platform with user login, menu display, and cart management.

🌐 **Cricket Score:** GitHub - scorecric

- Live score display app using external cricket APIs with real-time updates.

⚖️ Skills

Frontend: HTML5, CSS3, JavaScript, React, Next.js
Backend: Node.js, Express.js, REST APIs, JWT Auth
Database: MongoDB, MySQL
DevOps: AWS EC2, Netlify, Git, GitHub
Other: C++, Java, Manual Testing, Postman, VSCode

🎓 Education

Master of Computer Applications (MCA)
Radha Govind University, Ramgarh | 2021 – 2023

Bachelor of Science in Physics
Magadh University, Bodh Gaya | 2015 – 2018

📅 Certifications

- Full Stack Development (MERN) – Coding Ninjas
- Node.js Full Stack Web Development – Coding Blocks

🌐 Languages

- English (Fluent)
- Hindi (Fluent)
